PRESENTATION

OUR GOAL:

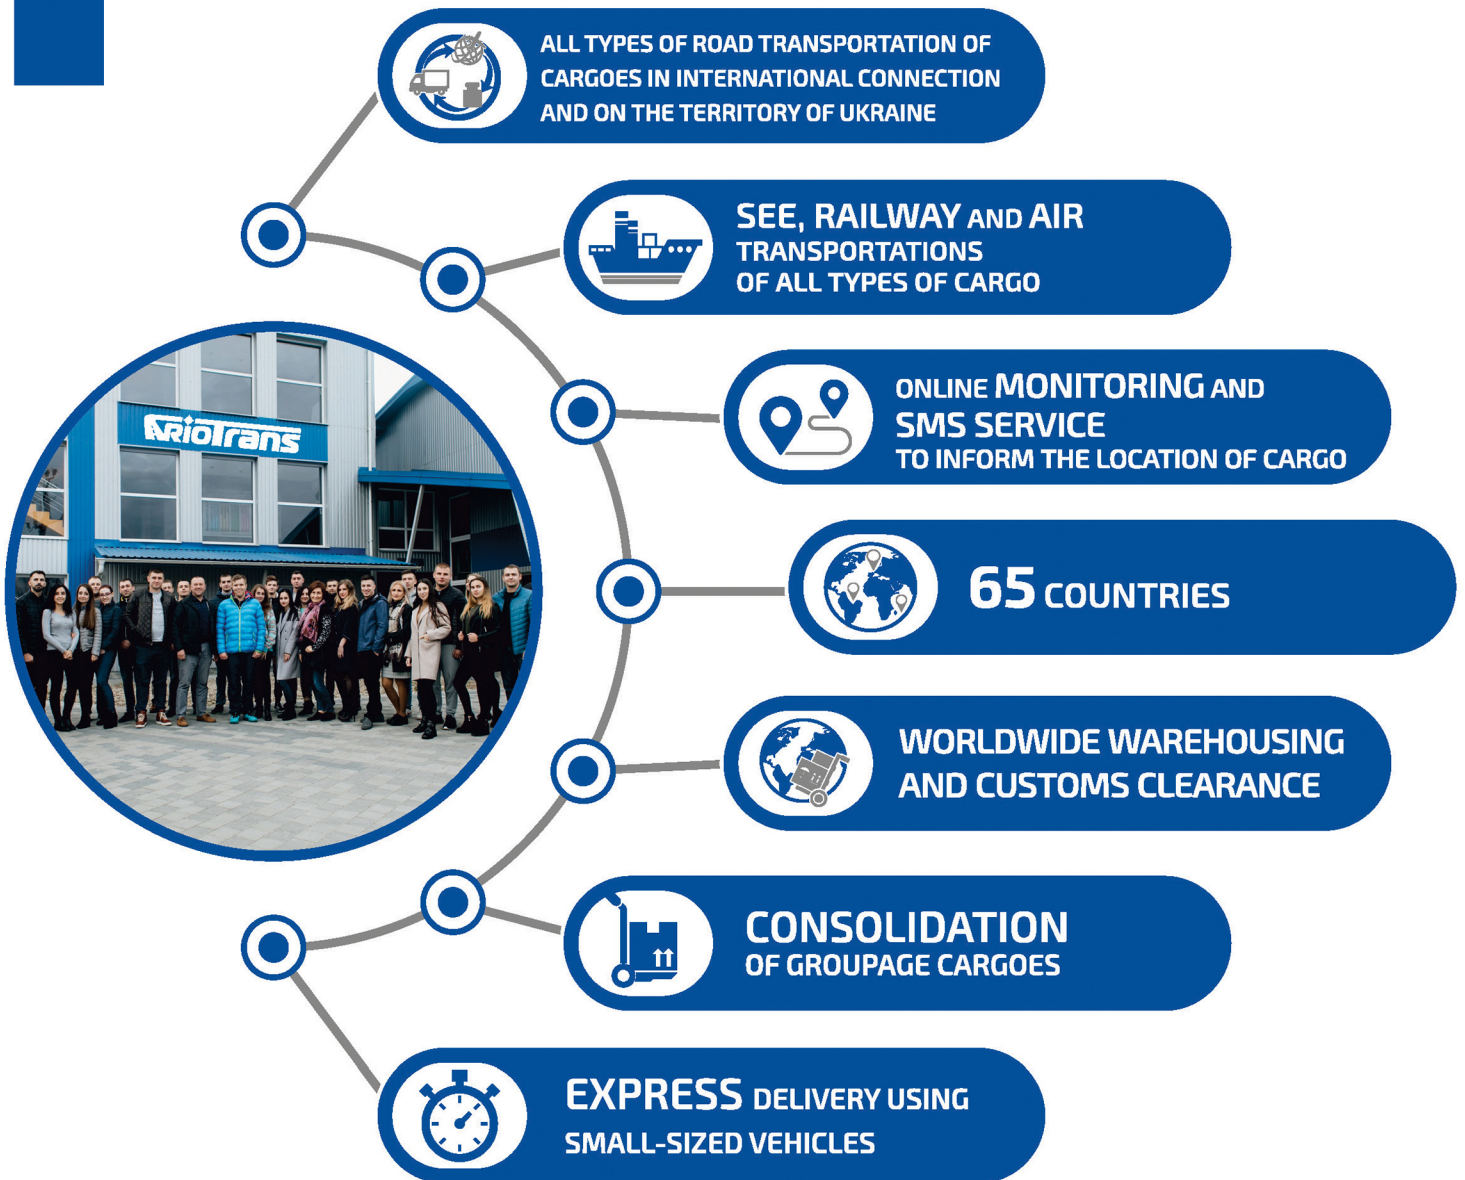

To help businesses of our partners to break borders and fully realize own potential in the global market.

WE ARE THE UKRAINIAN LOGISTICS COMPANY WITH OWN PARK OF VEHICLES.

OUR COMPANY IS DEVELOPING RAPIDLY AND AT THE MOMENT IS ONE OF THE LARGEST TRANSPORT - FORWARDING COMPANIES IN WESTERN UKRAINE.

THANKS TO RELIABILITY, PROFESSIONALISM AND PARTNERSHIPS WITH ALL THE LARGEST TRUCKS FLEETS IN EUROPE AND UKRAINE AND MANY WORLD OPERATORS OF SEA, AIR AND RAILWAY TRANSPORTATION, THE RIO-TRANS TEAM WILL EASILY HELP IN SOLVING ANY LOGISTICAL ISSUES WITH ORGANIZATION OF DELIVERY ABSOLUTELY ALL TYPES OF CARGOES.

THEY TRUST US:

WE WILL BE GLAD TO SEE YOUR COMPANY AMONG OUR REGULAR PARTNERS!

We don't work in a vacuum but rather in the dynamic environment. We are liable in front of the society for the environment protection.

We always consider what our company can do to reduce the environment pollution which is why we implemented the policy of sustainable consumption:

- we encourage our workers to minimize the wastes;
- we purchase the stationery that contain the recycled materials;
- to reduce the pollution from the electrical power generation, we use the energy-saving LED-based lighting;
- to avoid plastic water bottles, we are provided with own filtered water;
- we imposed prohibitions on using the disposable cutlery;
- taking care of the environment and customers, we apply the electronic document management services.

The green transportation policy:

- to reduce the emissions of the carbon dioxide, the transportations are carried out by vehicles of EURO 5, 6 standards;
- the priority is given to the consolidated solutions concerning the cargo transportations;
- encouraging the eco-systemic approach and taking into account the environmental security, we provide for the sea transportation services;
- to control CO2 emissions during the transportation, the environmental calculator is available on our web-site through the personal account;

In the nearest future:

In order to provide for the maximum optimization of our environmental impact, we are currently implementing the environmental standard ISO 14000.

In our work we are governed by the following standards:

- principles of bona fide;
- the policy of zero corruption tolerance;
- pro-active working;
- follow the highest ethical standards of business;
- carry on our business to be sure it passes any inspection;
- we cherish honest and objective partnership relations between the business and government;
- profit-making to each party of the transportation is not our only purpose but we also wish to create the social and emotional values;

In RIO-TRANS we believe that we are the company you can trust your cargo, since the small business (within Ukraine) does not determine the real scope of the business. Your heart and not your wallet is the first thing we want to gain. At RIO-TRANS we implement the international standards of management and logistics.

We are customer-oriented and on our web-site each customer has access to its personal account to trace the vehicles with your cargo and be notified of each change of the status. Delivering you cargo is not the only thing we do, our customers receive the complex solutions combining the speed and quality.

Thanks to the contracts concluded with all largest fleets of Ukraine and Europe, we provide for the reliable tools for the transportation. Securing the strategic partnership of the most prestigious national and international transport associations, we always protect the interests of our customers as our own interests.

Cooperating with us you receive:

- Uninterrupted supply of your goods to all countries of Europe and Asia with all types of vehicles within a year.
The specificity of the Ukrainian transportation market is that every year, August through December, the transport deficit is observed which is connected with the lack of permits for international cargo transportations. In contrast to most Ukrainian expeditions, we possess our own fleet and have contracts with many European partners which provides uninterrupted supplies for our customers for the whole year;
- The Unique system of monitoring over the location and current status of your cargo with the possibility to use it through the mobile application;
- Socially responsible partner with consistent principles and zero corruption tolerance;
- Flexibility and promptness of the decision-making Being the average-size company and having optimized our organizational system to the maximum extent, we instantly settle any issues arising during the logistic processes, without the excessive bureaucracy;
- 24/7 support. Logistics is not an easy task, sometimes different hardships occur during the transportations. Being a customer-oriented company, we are ready to provide our customers with 24-hour support, since we are aware of the importance of uninterrupted and timely deliveries;
- The whole logistics department represented by one person. Most of our customers do not need their own logistics department, since we cover 100% of your transportation needs. Behind the scenes, the team of logistic specialists may search for transport for you, but, for convenience, you communicate only with one manager appointed personally for your company;
- Reliability attested by our customers. In servicing our customers, we don't work just for a one-time profit. In our work, we strive to become a reliable partner for our customers and settle absolutely all logistic tasks.

We will be extremely glad to see you among our long-term partners.

**Yours faithfully,
Ruslan Shmakov
Sales Director**
