

1001 BEE PRODUCTS HIVES

UKRAINE IS AMONG THE TOP-5 WORLD LEADERS IN HONEY PRODUCTION

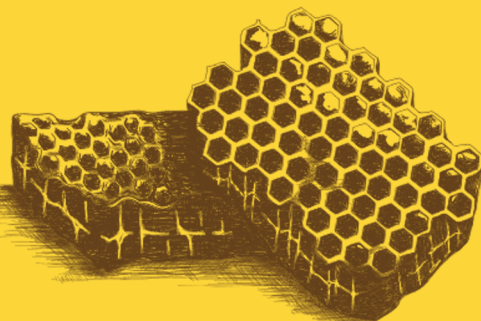

Ukraine is one of the main producers of honey in Europe. Around 1.5 per cent of Ukraine's population, over 660,000 people, is engaged in various forms of beekeeping, according to the United Nations.

Ukraine is among the top-5 world leaders in honey production and export and has a huge potential for further growth. Ukrainian honey is exported to more than 50 countries, and demand remains stable.

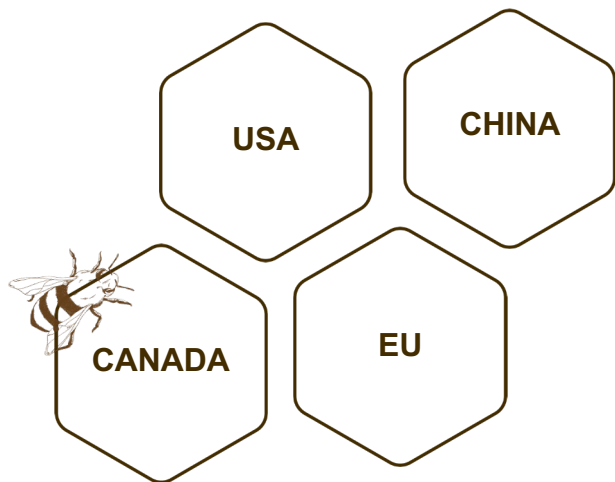

The main export markets of Ukrainian honey are the countries of the European Union and the United States, but the products are gradually spreading to the Middle East and Asia.

In 2019, honey exports amounted to more than USD 100 million, which is the second figure after a record in 2017, when products were exported by more than USD 133 million.

RUSSIA'S WAR AGAINST UKRAINE

It is difficult to predict the honey market in 2022 due to the war between Russia and Ukraine. Many apiaries and industries have been destroyed, most of them are under the occupation of Russia, there are problems with sowing in mined areas.

From February 24 to April 3, the apiary 1001 hives was also in the area of occupation in the Chernihiv region. Due to the massive bombing and the brutal occupation of the territory by Russia, we did not have access to production. On April 3, when the Ukrainian army drove the invaders out of the Chernihiv region and began demining work, we were able to get to production. The apiary miraculously survived, which we are very happy about.

ABOUT US

The family apiary "1001 hives" has been operating since 1954. The third generation of beekeepers makes life sweeter!

We are responsible for the quality of our products.

Our secret is to do as for ourselves. 95% of clients come back again. We sell honey, soufflé honey, beekeeping products. We provide branding services for corporate gifts and carry out orders for personal holidays. Our team includes cool designers, decorators and even personal managers for corporate clients.

For many years, we have been working hard to improve the quality of apiary products in honey production and have received recognition for our work in the direction of conformity and quality of honey and bee products according to world and international quality standards.

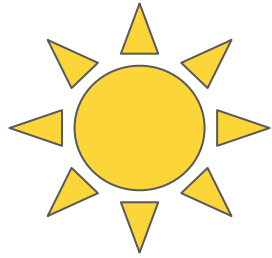

The international system for controlling the quality and safety of food products, the HACCP system, ISO 22000, was implemented in the production. This step allowed us to join the world producers and processors of high-quality, safe and useful food products produced in Ukraine. We are proud to offer a Ukrainian product for the international consumer market.

In connection with the 2022 war in Ukraine, all logistics and business chains are broken. Lost contacts with suppliers and buyers. We offer cooperation at the international level.
