# Our priorities and advantages:

A close-up photograph of two golden wheat stalks, showing the detailed structure of the grain heads and the long, thin awns. The background is a soft, out-of-focus field of similar wheat, creating a warm, golden atmosphere.

1. The company's high standards at all stages of flour production, starting with growing, cleaning, moistening, storage, mixing varieties to ensure the appropriate quality and grade, grinding, sifting and ending with packaging.
2. For the productive cultivation of corn with the best quality indicators, the company uses the latest irrigation and nutrition technologies, thereby ensuring large yields on a relatively small sown area.
3. Corn flour is produced in compliance with the highest sanitary standards of grain preparation, cleaning, moistening, degermination and grinding, and the latest flour milling complexes ensure high productivity and adaptability of the product to the end user.
4. We sow only high-oil varieties, we strictly observe the terms of grain ripening, the standards of its storage and cleaning before processing.
5. To obtain high-quality sunflower oil, APC Group uses technologies that allow it to preserve a maximum of useful substances, and refines it at all stages.

# APC Group and charity

Our values are not just nice words.  
Decency and kindness - for us it means: honesty, humanity, modesty,  
care, mutual understanding and charity.

Each of our partners takes an  
active part in charitable acts,  
because we take 1% of the amount  
of your purchase and help those  
who need it most: children,  
because they are our future.

At the beginning of 2019, with our joint  
help, one of the kindergartens was  
remodeled to improve safety.

APC Group helped one of the Poltava  
schools to equip a class for beginners  
according to modern standards for the  
convenience and quality of children's
